

## DuraTubes™...when resilience matters.

Homogenization calls for a tube that is built to withstand the rigors of lysing applications. So when you need to be sure about the tube you select for lysing and bead beating, choose the brand that has the experience, innovation and reliability of an industry leader: SureSeal DuraTubes from SSIbio.

The proprietary polymer used in DuraTubes allows them to withstand more than twice as much homogenization time in bead beating applications, compared to other popular screw cap microtubes.

### Advantages of SureSeal DuraTubes:

- Manufactured from a proprietary resin that is specially-formulated for bead-beating applications.
- Shatter-resistant—they're up to the task!
- Secure O-ring seal ensures a tight seal.
- Ultra-pure polypropylene meets FDA 21 CFR 177.1520.
- Graduated every 100 µL for easy volume estimation.
- Self-standing skirted base.
- Certified free of detectable RNase, DNase, DNA and PCR inhibitors.

Item #	Description	Packaging
2641-0B	2.0 mL Graduated DuraTubes & Caps, Assembled	200/unit, 5 units/case

**About SSIbio.** High-performance plastics are part of our DNA. For more than 25 years, we have been bringing innovations to life science consumables. Because of our commitment to quality, laboratories around the world have come to rely on our products for everyday research—as well as ground-breaking discoveries.

- All processes are controlled by an ISO-9001 Quality Assurance program.
- All product is made in Lodi, CA USA
- Over 39,000 sf of ISO 8 / Class 100,000 Cleanroom production.

We invite you to put our DuraTubes to the test in your lab and see why SSIbio is a world leader in life science plastic design and manufacturing.
